

Press Release

7/1/24 - For immediate release.

XSOF Inc. has acquired the assets and liabilities of R Specialty Optical Fibers LLC (RSOF) and Tratech Specialty Optical Fibers LLC (TSOF).

As a result, XSOF Inc. is taking the opportunity to consolidate operations into its Williamsburg VA location and that will be finalized by the end of 2024, or sooner.

All Members of the LLCs have become stockholders in XSOF Inc. and remain in their roles, and all key staff have been retained.

The Williamsburg VA operations of XSOF Inc. is housed in a new 8000SF facility in an economic opportunity zone in York County VA and has expansion options to significantly increase the footprint. The customized facility is producing fiber optic assemblies targeted at the Laser, Spectroscopic and Optical Metrology space, fabricating fiber optic devices for Medical, Defense, Material Processing, Sensing, Illumination, and Emerging Quantum applications. The facility, which includes a Class 8 clean room, is also currently fabricating Hybrid Opto-Mechanical-Electronic assemblies and will continue to enhance that capability.

Other leading edge products, notably Photonic Crystal Fiber (PCF) and Hollow Core Photonic Crystal Fiber (HCPCF) sealing, end capping and specialty terminations and packaging, along with the HP-2.5 High-Power Laser line of products and terminations, will benefit from the increased throughput and ISO standards at the consolidated location.
